

In the Claims

Please amend the claims as follows:

1. (Cancelled)
2. (Cancelled)
3. (Currently Amended) The security system according to claim [[1]] 14, wherein for installation in a monitored room, the mounting plate is installed at prescribed points, and the at least one danger sensor is attached to the mounting plate by means of the corresponding communication module.
4. (Currently Amended) The security system according to claim [[1]] 14, further comprising means associated with the communication module for protecting the at least one danger sensor against unauthorized removal.
- 5 to 13. (Cancelled)
14. (New) A security system for monitoring danger parameters comprising a plurality of danger sensors having detection modules for different danger parameters, wherein each of the danger sensor has a communication module for connecting the danger sensor wirelessly to a central unit and wherein the communication module has means for attaching the danger sensor to a mounting plate and wherein the communication module is designed to have uniform dimensions and shape for connecting different types of detection modules to any communication module.
